Briefing on Projection Equipment for WMVH Committee Room

Agenda item 85

1. **Background**
   1.1 Committee Meetings/ Council meetings agenda and shared documents for perusal and discussion – visual cues enable successful management of meeting focus
   1.2 Current screen not large enough for larger meetings and for text-based focus

2. **Proposal**
   2.1 WMPC purchase a portable projector for committee/council/training meetings
   2.2 WMPC purchase a larger (wider) screen – wall mounted – extending existing positioning to the left to enable enlarged view of computer files/presentations for whole committee group within the space

3. **Considerations**
   3.1 Costing – the aim is to keep costs reasonable while achieving the best visual quality
   3.2 Safe storage – portable electrical projection equipment can be stored securely in the WMPC office; retractable screen can be unobtrusively in place where the current unit exists without compromising the use of the room by other users.

4. **Benefits**
   4.1 Wide screen enables council agenda to be visible alongside documents under consideration
   4.2 Portable projector equipment can be stored safely when room in use by other users
   4.3 Presentations/ training videos + links etc can be viewed by committee, council or working groups
   4.4 This equipment will be able to support remote meeting access should the council wish to move in that direction

5. **Consultation**
   5.1 Need to explore the difference between 'HD' ready and HD descriptors in the spec
   5.2 Need to consider those projectors suited for room without blackout facility – so look out for reference to natural light capacity
   5.3 Long throw is more suitable for committee/board room than home cinema usage
   5.4 Need to consult the Village Hall CIO trustees regarding the replacement of the existing screen

6. **Installation/Storage**
   6.1 New ceiling brackets needed for wider screen
   6.2 Projector itself to be securely locked in WMPC office – check insurance cover? Portability a must but does make it more vulnerable to theft.

7. **Recommendation**
   7.1 HD options:
      - ACER X1328WHK (£349.00 Curry's)/
      - Epson CO – W01 – LCD (£419.99 + VAT – Visunext)
   7.2 2m + screen to accommodate two parallel computer windows open in presentation/ council meetings – 2.34m maximum suitable width for setting. Therefore Nobo (£235.00 Viking Direct)
   7.3 Overall cost approval sought is £750

Potential products for consideration:
